Assignment for Backend

Date: 7/11/2023

1. Create one landing page that gives the option for sign-in and log-in with proper authentication, then the data of sign-in should be stored in the database.
2. On the home page our Audio comics. Comics and videos should be visible one below the other as in the design.
3. If we click on Audio Comics it should redirect to the Audio Comic section where our comics should be visible the comics should be fetched from the database where our comics are stored. Same for all comics and videos.

Note:

- i. Please refer to the Assignment folder for design, products, and images.
- ii. Make sure that every transaction should be stored in the database.
- iii. For reference design the code at <https://github.com/ManideepKumarKR/App/>
- iv. For reference the dummy site is live at <https://manideepkumarkr.github.io/App/>
